

Leaving Certificate Applied Mathematics Face to Face Digital Technology Workshop

In ongoing support of teachers implementing the new Applied Maths specification, a workshop exploring the use of digital technology in the teaching and learning of Applied Maths will take place in March 2022. This workshop is open to all teachers who are teaching or are interested in teaching Applied Maths, including newly qualified teachers.

These evening workshops will take place face-to-face at different locations across the country and will:

- Provide participants with the opportunity to explore the role of digital technology in the teaching of different aspects of the Applied Maths specification.
- Engage with suitable tasks that encourage students to investigate different concepts in Applied Maths.

Teachers will also be provided with a USB and a booklet of resources and tasks on the night.
